## Meeting at

# HOTEL KRONONHOF

Mr. G. Stoll of Festo introduced **Mr. G. D. Naidu** to the guests, among whom Dr. Kemmler, Dr. Engelen, Dr. Ebert, Dr. Freihofer, Dr. Krehl, Frau Breske (Chamber of Commerce), Mr. Spatz, Mr. Kummel, Mr. Walter Eberspacher, President Rotary Club, Dr. Springob, Mr. Stifflemeire, Mr. Boley, Mr. Hirsh, Dr. Mauz, Mr. G. Stoll, Mrs. Stoll, Miss Gerda, Mr. G. Kurt, President of German - Indian Society, Representative of Messrs. Madaus, Mr. Wilfred, Dr. Smoll, Mr. Kuchul and others were present.

Address by

## Mr. G. D. NAIDU

*Dear Doctors, Business friends, Ladies and Gentlemen,*

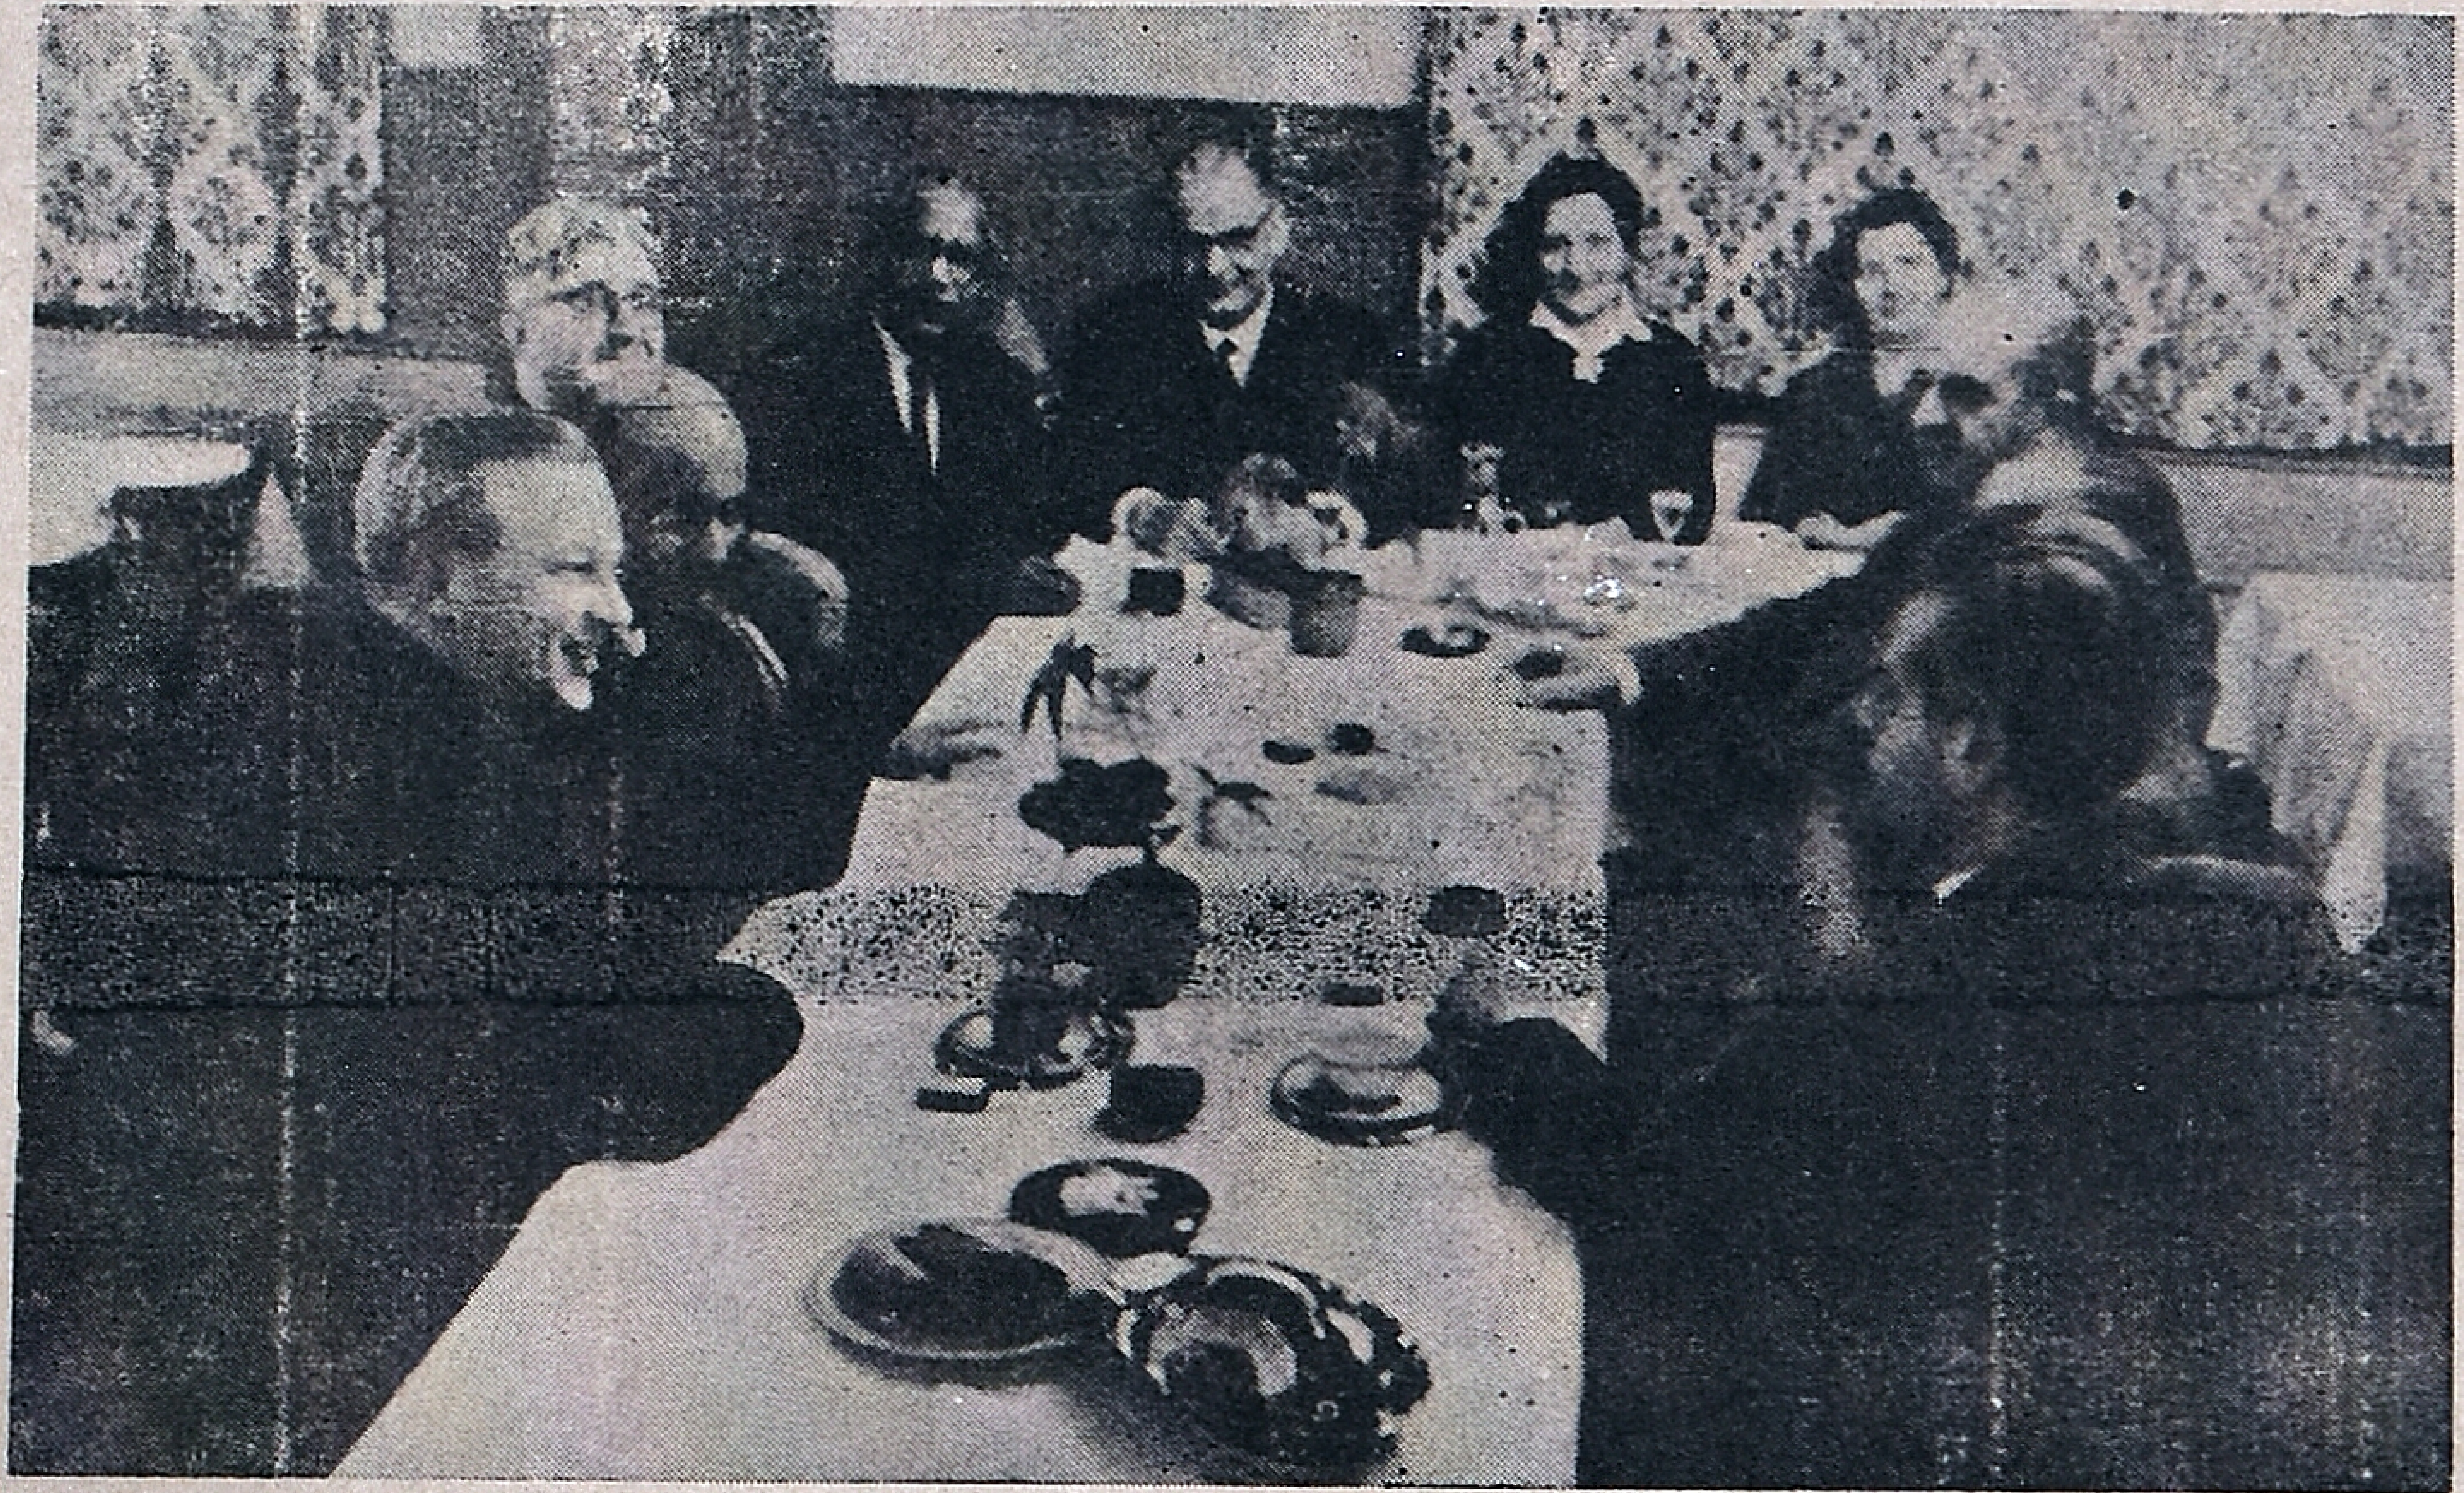
I am very happy to be here to-day in the midst of enlightened people, doctors and others. My business was only automobile one. I do not know English. I had

never been to any school. By practice only, I learnt English, and Germany was in a way responsible for that. When I came to Germany, I did not know any foreign language. German language was very hard to learn and hence I was compelled to learn English.

Before the war, Mr. Kuhns, Director of Continental Tyre Co., who had been to my house at Coimbatore invited me. Because of Mr. and Mrs. Kuhns, I came to Germany. This was exactly 25 years back. I then met Mr. Schmidtman, 20 years back. In these 25 years, I travelled all over the world except South America, New Zealand, and Australia. By visiting all these countries, I gained knowledge by practical experience. That was the school for me to learn something.

After seeing the agricultural improvements in Jerusalam, and California and also in our own country, I too started a farm in a small scale in India. In the Educational lines, I started some school and a college for Polytechnic with the aid of Government. In that college, I was not

Doctors Meeting at Hotel Krononhof in West Germany.



Doctors Meeting at Hotel Krononhof in West Germany.

able to reduce the period of the Course from the existing one. In England, America and Germany, 2 or 3 years are required for a diploma. In India, 3 years for diploma and 5 years for the degree. But in my opinion, so much time is not required. If it is properly taught, 1/10th of the existing time is enough. Then I started one such institution for automobiles in 6 weeks' Course and another for Radio also for 6 weeks. They work very well. I shall quote here one of the observations made by a Planning Officer of the Government, Mr. H. B. Mohanty of Cuttack.

"Ever since I visited your ideal institution, I have been insisting on my government to send a few students there for training in Automobile and Radio Engineering. Government have now sanctioned scholarships and they have asked me to request you kindly to spare as many seats as you conveniently can this year. Our requirements are three seats in each of the subjects, but we will be satisfied with whatever you can spare. I am therefore making this personal request, because, I have told my

Government that the boys receive a type of training in your institution, which they will get no where in India. I have seen most of the institutions in India and my firm conviction is that the training and moulding of character for which your institution provides facilities is unique in India. That is why we are so very anxious to get a few students trained there and I hope we will not be disappointed.

For this institute, Mr. Kurt of Festo came as a student, we never took him as a student, but we took him as a teacher. Werner Weis also came and joined automobile Course. Then Mr. Bofinger's son also came. They also learnt to make Uppuma and other Indian dishes. With these two Courses, I started Bacteriology course also. Thus three courses – Automobiles, Radio and Bacteriology course were started and conducted as a 6 weeks' course.

Before the Bacteriology course was introduced, I injected chemicals for a plant and in other plant, injected charcoal and salt and in a third plant, the extract from

another plant. Thus I went on experimenting with the various plants. If I narrate everything, it will take a long time. To cut short, after 7 years of experiments, I was able to increase the power of the plant, both in yield and quality. In America and Japan also, they do give injections to the plants. But the results are different, in some the yield increases, in some others; the plants grow in size only and in still others, roots increase in size. But in the method of injection followed by me, plants grow in size, at the same time giving a better yield and quality of 5 to 10% higher. After injection, in one pappaya tree, the fruits produced were different some tomato like, some Mango like, some pumpkin like.

The idea struck to me on account of the Medicinal herb system prevalent in the southern part of India from where I come. This system is 4000 years old and it is known as "Siddha System". That is the oldest system. A part of this spread to Eastern Countries such as China and another small part to Arabian Countries. Though the system is prevalent for a long time, it is not known to people living in the

rest of the world. The reason is that doctors who knew the system well refused to disclose it to others. The Medicines are so simple and easily available and if they disclose these to patients, they will lose confidence in their curing power.

Different parts of a plant are useful to different diseases. For instance, if the root of a plant is useful to cure one disease the stem is useful for another, the leaf for a third disease, the flower for a fourth disease and so on. Further, the same plant's medicinal qualities depend upon the soil, altitude and surroundings in which it is grown. All these plants are available in South India. In fact, every one in South India with the aid of Siddha System, was adopting preventive methods and only in rare cases, they had to resort to curative methods. Thus most of the plants were used in one form or other in their daily life.

For instance, take this plant. With the branches of these plants every South Indian as a rule, cleans the teeth. This serves to keep the teeth clean and white and also kills the germs, if any, between the teeth.

This leaf known as betel leaf:- It is very good for digestion, and also for cough. Besides, these, it gives a red colour to the lips which is not harmful like lip-sticks - which do no good from health point of view.

Take this leaf (Adothodi). It is good for asthma.

Thus almost all the leaves that are used in this system of medicine are easily available and are within easy reach of poor and rich alike. It won't cost even one cent. Yet its effects are tremendous and diseases are cured marvellously. But if the patient comes to know that the herbs are one which they see every day near and around homes, they may lose faith and further familiarity breeds contempt. The diseases are cured 50% by confiidence and 50% by the Medicinal effects of the plants. On account of this, old doctors when they imparted this knowledge to others, they levied a condition that it should not be told. The present doctors took that very seriously as an order to be followed implicily. Thus, the spreading of the knowledge of this system was restricted.

There were eminent doctors in India and are still a few even now. There was one Dr. Guruswamy Mudaliar, who died a few months back. He will just see the patient, feel the pulse of both the hands by his own hands, - all these in 10 minutes and he will write out the prescription, while other allopathic doctors take a lot of time to do all the tests and then come to the same decision.

Then how is this system not known to westerners who always want to test any system scientifically? They come to Bombay, Delhi and Calcutta. Then they return. A very few Swedish people and few Italians came to South 100 or 200 years back. Thus, most of them do not know the rich heritage of India in these matters which date back to 3000 or 4000 years. And even the few who came to South India are not told about this science on account of the restrictions placed by the ancestors and because of their too modest nature to come forward to disclose this fine art. Thus, every one knows of Ayurvedic and Unani Systems of medicines only and not Siddha which solely belongs to South

Doctors Meeting at Hotel Krononhof
in West Germany.

Doctors Meeting at Hotel Krononhof in West Germany.

India. I would go to the extent of saying that all other systems developed from Siddha only. There is no disease for which no medicine is available in Siddha system either as a curative or as a preventive.

I too did not believe for some years. Then I tested a few cases – I was satisfied. Then I wondered why this system, simple, unharmful and very cheap is not prominent. I took interest and 4 or 5 years back I called for a conference of the doctors who knew this system. As a result of this conference, I came to know why they did not spread the knowledge to others. I told them that 40 years back, there were 60,000 doctors practising this system - now there are only 11,000 doctors and in another 25 years, there will be no doctors at all, if this state of affairs is allowed to continue. Then a few Doctors came forward to disclose the system so that it can be useful to all. I am, therefore, experimenting with the plants and making medicines.

I arranged for an exhibition in 1954 and exhibited the medicines for diabetes, leuco rhoea and piles. I invited all

allopathic doctors. They do not want to accept that these medicines are good for their own reasons. One of the reasons is that it takes a very long time to cure. True it is but it is equally certain that it is a sure cure and above all, there is no harmful effect at all. But with other medicines, one is not sure of the reactions.

In 1954, one Dr. Penzel of Munich read in the papers about the medicine for diabetes. I brought the medicine to him in the end of 1954. In 1955, I gave medicine to some patients. They were completely cured. In the same way, for Leucorrhoea, medicines were given here and in England also.

In G e r m a n y, there are several medicines for diabetes. They replace "insulin". The doctors have raised a querry, how can the 'spoiled Pancreas' be revived. I can quote a number of cases, where insulin or modern drugs failed to cure yet they were cured by the diabetic food we prepare. The following few are the data for the cases cured :

Diabetes Mellitus. Albert Kieser 21-3-55 — 10-7-55) Sugar in urine and blood decreased steadily. Put on weight.

21-3-55 Blood sugar 250 8 mg. per 100cc.
14-5-55 160.0

**Report on my Diabetes Case:**

From Mr. Kummel I learnt that Mr. G. D. Naidu has a medicine against Diabetes. Mr. Naidu was kind enough to put this medicine at my disposal for a cure.

As regards my personality and my diabetes case:

I am 52 years of age and have had sugar in blood and urine since 1952. Early in 1955, the sugar percentage in the urine had risen to 5. My physical state was such that I was practically no longer able to work. My weight had decreased from 160 pounds in 1952 to 118 pounds in March 1955.

On March 21, 1955, I started the cure with the medicine put at my disposal by Mr. Naidu and I finished it on 30th July, 1955. During that time, the sugar percentage in the urine and in the blood decreased

steadily. My weight increased by 15 pounds during that time. My state of health was such, that I could fully fill my position as a foreman in a machine factory. Since the cure was complete, no sugar could be found at repeated thorough medical examinations.

My state of health is excellent. I am greatly obliged to Mr. Naidu for the medicine put at my disposal.

Earls Court, S. W. 5.
18th October, 1955.

G. D. Naidu Esq.,
30, West Cromwell Road,
Earls Court,
London, S. W. 5.

Dear Mr. Naidu,

I would like to thank you for the medicine you gave me for Leucorrhoea.

I must mention here that I did not at all know that what I was suffering from was a disease; hence I did not go to any doctor – the symptoms of which were pain in the back and constant poor health and tiresomeness. It was only when I typed your letters to various doctors in Germany and Switzerland did I come to know that I had the same disease.

I have been suffering from this for the past 10 years and after taking your medicine for only six days I was free from all the symptoms and now enjoy a good appetite and good health. I have also gained six pounds in weight.

I am really very grateful to you for having given me this medicine and am quite sure that many more women who take this course will undoubtedly be cured as I have been.

I do not know really how to repay you as you refused to take payment for the treatment. So I trust that this letter expressing my gratitude will compensate for it.

Once again I thank you very much indeed for your kindness and my good wishes go with you in all your endeavours to help mankind.

Yours sincerely,
(Sd.) (Miss) C. M. Middleton.

24, Philbeach Gardens,
Earls Court, S. W. 5.
20th November 1957.

With reference to my letter of 18th, October 1955, I wish to inform to you that since taking the medicine you gave me (to stop discharge) I have not had any further trouble. I have kept better health, regular periods and now happy to say that I am expecting a baby.

I thank you for helping me to cure this complaint.

Yours truly,
(Mrs.) C. Gorden
(C. Middleton)

24, Philbeach Garden, Earls Court, S. W. 5
25th June, 1956.

Dear Mr. Naidu,

I am sure you will be greatly surprised to hear from me.

First of all I must ask you how you are keeping in health. I trust you have been able to carry out the numerous tasks you set yourself before you left England, and I sincerely hope you have put them through successfully – of this I have no doubt.

I am getting on very well and you will be pleased to hear that I am getting married on the 28th of July '56. It is a great pity I did not make up my mind to get married when you were here. However when you do come to London again, you must come and take tea with me in my own home. You will also be pleased to hear that I have had no more trouble since taking the medicine you gave me and hope many more have found relief too.

Well Sir, I shall not prolong this letter as I realise what a busy person you are – are you sleeping more these days? I trust your wife and family are well and accept my best wishes for success in all you do.

Good bye, good luck and may the good Lord bless you.

Yours sincerely,
(Sd.) Christine Middleton.

Fronk. Father A — Age 50

Duration of the disease: 1½ years.

From sugar in urine, doctor said he was highly diabetic. "Insulin" from 24—11—55.

Glucose Tolerance Test, G. H., Coimbatore, 20—6—56.

| | | |
|---|---|---|
| Fasting | 140 mg% | |
| ½ hr. after Gl. | 160 | |
| 1 ,, | 110 | Patient stated that the examination and times of taking blood were not as stated in the report. |
| 1½ ,, | 190 | |
| 2 ,, | 170 | |

"Treatment with Diabetic Powder" from 21—6—56.

At the end of 6 weeks, on 8—8—'56 I had a Glucose Tolerance Test done in the Pasteur Institute at Coonoor with the following result:-

| | B | U |
|---|---|---|
| Fasting | 83.6 | nil. |
| ½ hr. | 162.0 | nil. |
| 1 hr. | 195.6 | nil. |
| 1½ hr. | 201.2 | nil. |
| 2 hr. | 167.2 | nil. |
| 2½ hr. | 117.2 | nil. |

Once again I thank Dr. Naidu because, by the diabetic powder, by the grace of God I am now very well and active for my daily work."

12—11—'57

I am going on well and no sugar found in the urine till now. Quite fit for my work. I pray specially for your health. Thanking you in earnest and wishing you a long life "ad multos annos"

I beg to remain
yours most lovingly
(Sd.) Fr. A. N. Corde Jesu O. C. O. M.

## Effect of treatment with Diabetic Powder on Hyperglycemia.

Rev. Father H. J. P. (History)
Duration: December 1941
Per cent sugar in urine: 2

Complaint: at T. B. Sanitorium, trace of sugar was found in urine.

Treatment: In August 1954 took Insulin continuously - even now taking 40 units daily.

Glucose Tolerance Test. G. Hospital, Coimbatore —7—55.

| | | |
|---|---|---|
| Fasting | | 200 mg% |
| ½ hr. after Glucose | | 210 |
| 1 | ,, | 220 |
| 1½ | ,, | 220 |
| 2 | ,, | 240 |
| 2½ | ,, | 260 |

Glucose Tolerance Test, G. Hospital, Coimbatore 16—6—56.

| | | |
|---|---|---|
| Fasting | | 190 mg% |
| ½ hr. after Glucose | | 200 |
| 1 | ,, | 220 |
| 1½ | ,, | 210 |
| 2 | ,, | 210 |

"Treatment with Powder" from 22—6—56.

Glucose Tolerance Test, Pasteur Institute, Coonoor, 28—8—56.

| | |
|---|---|
| Fasting | 127.7 mg% |
| ½ hr. after Glucose | 231.8 |
| 1 ,, | 240.8 |
| 1½ ,, | 243.4 |
| 2 ,, | 191.2 |
| 2½ ,, | 150.7 |

The patient was advised to continue the treatment and to report at intervals.

(3) Dr. V. T. Age 58

Family history of diabetes

Duration of the disease: nearly three years

Estimation of Blood Sugar: Bangalore,

172 mg% 18th June 1956

Glucose Tolerance Test, Pasteur Institute, Coonoor, 4—7—56.

| | |
|---|---|
| Fasting | 229.4 mg% |
| ½ hr. after Glucose | 314.6 |
| 1 ,, | 360.6 |
| 1½ ,, | 367.1 |
| 2 ,, | 295.0 |
| 2½ ,, | 288.5 |

Treatment: Powder 8—7—'56

Glucose Tolerance Test, Pasteur Institute, Coonoor, 8—8—1956.

| | |
|---|---|
| Fasting | 173.2 mg% |
| ½ hr. after Glucose | 229.2 |
| 1 ,, | 290.8 |
| 1½ ,, | 268.4 |
| 2 ,, | 257.2 |
| 2½ ,, | 229.2 |

Glucose Tolerance Test, Pasteur Institute, Coonoor, 25—9—56.

| | |
|---|---|
| Fasting | 125.0 mg% |
| ½ hr. after Glucose | 174.9 |
| 1 ,, | 218.7 |
| 1½ ,, | 224.9 |
| 2 ,, | 168.7 |
| 2½ ,, | 156.2 |

Patient advised to go back home and continue taking the powder once a day for a month or two and to go over here for examination.

"My conclusion is, for the first 4 weeks of treatment, my blood sugar has reduced from 229.4 to 173.2.

Now after another 4 weeks treatment, that is from 9-8-56 to 11-9-56, my blood sugar is reduced from 173.2 to 118.1. (of course it is only my conclusion).

So for the first 4 weeks, the reduction is 56.2 units, for the second 4 weeks, the reduction is 55.1 units. It is a marvellous achievement. Please accept my hearty congratulations and excuse me for my own enthusiasm of announcing my own calculation........

As a medical man of 30 years standing, I am of opinion that I have cut away one third of my usual diet in this four weeks of treatment; still I have increased by 2 lbs. in the same weighing machine and I feel that I am more active than before the treatment and feel quite fit as if I am rejuvenated."

In connection with the treatment I had at Coimbatore under you during the months of July and August 1956 for diabetes, which disease I was suffering for 3 years previously.

I am pleased to express my sincere opinion regarding the efficacy of the medicine.

Before treatment my fasting blood sugar tested at Pasteur Institute, Coonoor was 229 mgm. After two months' treatment, the similar showed 125 mgm.

Even now, i. e., 10 months after the treatment I am not having any symptom of diabetes.

I feel quite fit and normal.

I am very grateful to the institution which has helped me to regain my normal health."

Mr. P. V. N.

Age: 37 (on 22-10-56)

Duration: 3 months (urine 3% sugar)

Both parents are diabetic.

Glucose Tolerance Test, Pasteur Institute, Coonoor, 19—10—'56.

| | |
|---|---|
| Fasting | 142 mg% |
| ½ hr. after Glucose | 206 |
| 1 ,, | 220 |
| 1½ ,, | 236 |
| 2 ,, | 251 |
| 2½ ,, | 213 |

"Treatment with Powder" 25—10—56.

Glucose Tolerance Test, Pasteur Institute, Coonoor, 15—2—57.

| | |
|---|---|
| Fasting | 81.8 mg% |
| ½ hr. after Glucose | 154.5 |
| 1 ,, | 181.8 |
| 1½ ,, | 140.9 |
| 2 ,, | 90.9 |

I have completed 37 years on 22nd October 1956. On 21st June 1956, in my urine, sugar was found to be 3%. I started on dietetic treatment. I was referred to

Dr. Naidu for treatment. Glucose Tolerance Test done on 19th October '56 showed fasting blood sugar 142 mg% and after 2½ hours 230 mg%. Immediately treatment was started. Glucose Tolerance Test done on 15—2—57 showed fasting sugar 81.8 mg% and after 2 hours 90.9 mg%. Urine sugar remained nil throughout. Treatment has been discontinued after 10 days. Since then I do not have any feeling of exhaustion or giddiness at any time I am able to work with the same good old enthusiasm for hours together without getting fatigued. I am grateful to Mr. G. D. Naidu and Dr. Naidu for the help they rendered in my diabetic condition."

Mr. T. V. D. R. (History)

Age: 31½ (on 3-10-55)

Duration: 2½ years

Percentage sugar in urine: over 3%

Complaint: Sleeplessness, loss of weight, thirst.

No family history.

Previous treatment:

Diet: Ragi and wheat instead of rice, and no sugar. Oct. 55 - Dec. 55 Homeopathic treatment. Jan. 56 - March 56 Insulin injections every week. March 56 - June 56 Salem Ananda Thirtha's treatment. June 56 - Aug. 56 Madura Homeopathic treatment. Sept. 56 - March 57 Siddha Bhas-mas-treatment (Abrhaka, Silajit, Poornachandrodaya, Kaantham, Vangam etc.)

Glucose Tolerance Test, Pasteur Institute, Coonoor 14—4—'57.

No. 9. C. Tannery Road, Cleveland Town,

Bangalore, Dated: 11-6-57

To
Mr. G. D. Naidu,
President,
The Industrial Labour Welfare
Association Ltd., Coimbatore.

Respected Sir,

I offer my most sincere thanks for the very efficient treatment you have given me for my diabetes. Indeed your medicine is a godsend to humanity. May the Almighty direct all the rest of the diabetic to you, so that they may all be benefitted.

I may be permitted to state that out of all patients who were cured by you, I top

the list in the quick progress made as is evidenced in the test at Coonoor on 4-6-57. Within a period of 42 days, it was nil and below normal.

My thanks are also due to the experienced doctor who has taken a lot of pains with a determination to cure the patients completely.

May God bless you and the doctor and preserve you for many more years so that the suffering humanity may be immensely benefitted.

Yours obediently,
(Sd.) T. V. D. R., M. A.,

ASHOK BHAVAN
De Luxe Tourist Hotel

Junction Road,
Trichinopoly,
8th December, 1953.

My dear Sir,

This is just to inform you that the lady who had been there in connection with eye treatment feels that her headache has improved even though she gets it atleast one day in the week. She continues carrying out the instructions you gave and I hope she would be allright.

Are you going to Trichy in the near future so that I can make myself available here during your visit here. Dr. and Mrs. Robinson has asked me to convey their regards through this letter.

With kindest regards,

Yours sincerely,
(Sd.) T. N. Ramaswamy.

V. A. Venkatesalu, B. A., C. A. I. I. B., Agent, Andhra Bank Ltd., Madras.

Madras, 6th April 1954.

Dear Sir,

I beg to offer my sincerest thanks to you for giving an opportunity to my wife who was suffering from Leucorrhoea which she is completely cured now, after taking the medicine given by your Doctor.

She had this complaint for the last 2½ years during which period a number of Doctors have been consulted, a series of injections and other medicines have been given, which gave only temporary relief and they recurred after a period.

The medicine given by your friend was extremely useful in as much as after taking about 5 doses, were over, she was completely cured.

Her only prayer was that it should not recur after a monthly period. It has not recurred as it did when other medicines were taken and she feels completely cured and quite fit. She has been speaking very highly of this medicine to her friends who

are also desirous of taking this medicine, if possible.

I once again thank you for the kindness in allowing my wife to have this course of medicine.

Yours sincerely,
(Sd.) V. A. Venkatesalu.

There are 30 million diabetic patients in the world. In England 45% of women suffer from Leucorrhoea, France 60%, India 55%, Germany and Japan 40% and China 80%. Then one asks the question why these medicines are not encouraged in India? The explanation is simple - For the last 200 to 300 years, no research was possible for obvious reasons. Allopathic doctors do not want to take this without research. I do not also want to give these medicines to the patients who are not under my supervision. Suppose I give the medicine to a patient, he takes it and then consults his own allopathic doctor who does not realize the value of it. He may misguide or he may stop taking medicine. Thus one will not get the desired result.

I, therefore, invite Doctors from here to come and do researches on these plants. One may say, send those plants and we shall do research here. In the case of medicinal herbs, one must remember another fact. The same plant differs in the curative quality, according to the altitude in which it grows. So much depends upon the climate too. These medicines are wanted more and more in America and Germany. I have already 4 acres of land in which these plants grow. I am preparing another 120 acres for the same purpose.

We have another difficulty in sending these medicines here. As medicine, we cannot export, so we have to send these as Medicinal food, as food is permitted to be exported without licence to Germany and Austria. If it is medicine there are more restrictions in Germany. I am preparing this medicine and sending the medicine in food form. Madras representative came to my place. I was then here. He wanted to see the laboratory where these medicines are prepared. Persons in charge told him that medicinal food is prepared and not medicine. He expressed no interest in that and returned back. So also, many doctors returned without proper guidance.

I, therefore, request you doctors and others who are interested in research to visit my place as my guest. You can do wonderful work in this system of medicine which will be very great service to humanity and will also go to a large extent to bind our two countries in economical field also.

I have the greatest confidence in the ability of Germans. When I came to Stuttgart in 1950, the town presented a desolate appearance. In Cologne also, same was the case. It was smelling awfully bad. Now what is the position, these towns and other towns developed enormously.

Mr. Kurt wrote to me that in one year of his starting factory, he manufactured 20,000 machines. I can site some more instances. What I want to impress upon you is that if you, Germans, take up a matter, you will do it better. That is why I am asking you to come to India and do some research. I have been telling for the last 3 or 4 years in several places. No body pays heed to my request.

Probably you want to take your own time to take the decision. Or I must say that I don't want your help. Then perhaps you will rush to come forward to accept my invitation.

Some friends, some time back offered me 120 million rupees to start some industries. I refused and said I am interested only in Siddha Medicine. The Government has now come to take interest, Prime Minister Nehru, Mr. Gopal Reddy, a Minister in the Central Cabinet are also taking interest. For investment India is the Country.

There are eminent doctors in this system such as Mr. K. A. P. Viswanathan, Mr. Kandasamy Mudaliar, Dr. W. V. Perumal Mudaliar. They will all help you to do the research. Once again I wish to reiterate that these medicines are simple and give a guaranteed cure.

I have invited 4 girls from here to India, to learn Radio manufacturing, health herbs and Indian cooking. Our foods are simple and at the same time healthy. In the Pasteur Institute, on analysis, it was found that one of our dishes stands first as a balanced diet. Next comes Porridge and cream of Scotland. Third comes Germany's black bread and cheese. Fifth is our 'Uppuma' which you just now ate. Seventh is Dosai (Pan cake). Such is the nutritious value of our food. In London, there were only two Indian restaurants a few years back. Now there are 45 restaurants and frequented more by English people.

Thus India can offer you better ways for tasty preparations, medicinal herbs and Indian philosophy, and she expects from you your technical skill and scientific knowledge. If we exchange these between our two countries, we both will stand above all the rest of the world in the service to humanity.

I have taken much of your time for which I request you to excuse.

I have to thank Mr. Stoll and Mr. Schmidtman who arranged this meeting and Dr. Smoll, Dr. Kember and other business friends who spent their valuable time in listening to me.

Thank you all friends.
